

# REFRIGERATION THAT'S BUILT TO LAST

BACKED BY 24/7 SERVICE YOU CAN RELY ON

Providing refrigeration engineering, installation, maintenance and 24/7 emergency breakdown services to Australian businesses since 2003.

# WHY BONNEY IS BETTER

Your refrigeration needs are unique. That's why we take the time to understand your industry and business challenges – and design a system that's right for you. With performance and longevity our priorities, Bonney has been the partner of choice for countless commercial businesses since 2003.

## **A family name you can trust**

A family business since 2003, we are known for our down-to-earth and personable approach. Our reputation is our lifeblood – and we protect it fiercely.

That's why we employ Australia's best refrigeration technicians, instilling the importance of clear communication and integrity in all they do.

And thanks to our strong name, we also have a trusted network of parts suppliers – to give you the responsive repair service you deserve.

## **We're here for you – around the clock**

We know how much is at stake if your refrigeration system stops performing the way it should.

But with Bonney Refrigeration, you can breathe a sigh of relief, because we'll always pick up your call. Day or night. Every day of the year. That's our promise to you.

And if needed, a specialist Bonney technician will be at your site – in a heartbeat.

## **Good for the planet – and your business**

Savvy businesses today demand refrigeration that's high-performing and energy efficient. And we've met that challenge, time and again.

Built with the latest technology, our systems minimise the impact to the environment, while also keeping your operating costs down.

That's a win-win – for the planet and your business.

## **More affordable to install (and maintain)**

We design every system to stand the test of time – using top-end materials and superior craftsmanship. What's more, we do it all at a highly competitive price.

And when it comes to maintenance? You won't find a more cost-effective or reliable service program than ours.

Designed for you. Built to last. Affordable to run. That's Bonney.

# WE DESIGN AND INSTALL

We make understanding your needs our priority from the outset – so that we can design and engineer a system that’s right for you, for years to come.

For us, system customisation is not a ‘nice to have’. It’s a must.

And when it comes to installation, we take great pride in delivering a top-quality finish, every time. We also complete every job on time and budget, no matter what unique needs you may have.

# WE SERVICE AND REPAIR

We're there for you when you need us. It really is that simple.

With Bonney, you get a maintenance program that's perfect for your business. We'll give your system the regular love and care it needs – along with straightforward reports after each service that detail our findings and recommendations.

And as for sudden breakdowns? We say 'no thank you'! That's why we service your system regularly to identify potential problems, before they have a chance to develop.

But in the unlikely event that an emergency does arise, we're available 24/7. No ifs or buts about it.

# YOUR INDUSTRY IS OUR SPECIALITY

From hospitality and retail to food processing and cold storage, all types of industries turn to Bonney for their refrigeration needs. So you can rest assured that we understand the specific demands of your sector – because we've met them with ease, many times before.

- Vacuum coolers
- Ripening rooms
- Cool rooms
- Forced air coolers
- Long-term storage
- Pre-coolers
- Cold storage
- Hydro coolers
- Controlled environments
- Ultra-high humidity refrigeration
- Pressure coolers
- Ice makers
- Rapid/fast cooling

## FRESH PRODUCE

Whether you're a grower, distributor or retailer, we can customise a refrigeration system to suit your produce type, process stage and packaging.

And we're highly aware of the importance of getting the temperature-humidity balance just right.

It's all about maximising the shelf life of your flowers, fruit or vegetables – so that you can sell more. Day in, day out.

- Under bar fridges and freezers
- Cool rooms
- Ice machines
- Glycol systems
- Display cabinets
- Freezer rooms
- Beer systems

## HOSPITALITY

Fast-paced and ever-changing. We know that hospitality businesses are high pressure environments. And when it comes to your reputation, food quality and customer satisfaction are everything.

In an industry where reliable refrigeration is a must, Bonney offers first class systems and maintenance – backed by a 24/7 emergency service you can depend on.

- Milk vat cooling
- Milk cooling systems
- Humidifying and dehumidifying systems
- Cold storage
- Secondary cooling reticulation systems
- Silo cooling
- Chillers
- Cold rooms
- Heat recovery
- Brine and water chilling

## DAIRY

At Bonney, we know that dairy products require precise temperature control for utmost consumer safety.

And we know how fast dairy products can spoil if you have a breakdown.

That's why we design systems that ensure the longest possible shelf life for your dairy products. What's more, we're on call 24/7 all year round – giving you the peace of mind you need.

- Blast chillers and freezers
- Tunnel freezers
- Humidifying and dehumidifying systems
- Freezer rooms
- Plate freezing
- Brine and water chilling
- Spiral freezers
- Tunnel cooling
- Cool rooms
- Cold storage
- Secondary cooling reticulation systems
- Heat recovery systems

## FOOD PROCESSING

Your food processing and manufacturing business needs top quality refrigeration that performs around the clock.

So, when it comes to poor performance, that's a risk you simply can't afford to take.

At Bonney, our deep knowledge of refrigeration design, installation and maintenance in the food processing industry will stand you in good stead.

- Low charge ammonia systems
- High-efficiency motors, evaporators, condensers and components
- Optimised energy efficient control system
- CO2 systems
- Non-corrosive materials to extend life
- Anti-rooms
- Humidifying and dehumidifying systems
- Cool rooms
- Freezer rooms
- Cold storage
- Secondary cooling reticulation systems
- Heat recovery systems
- Blast chillers and freezers

## COLD STORAGE AND DISTRIBUTION

With rising electricity prices, efficient refrigeration is key to the success of your cold storage and distribution business.

And Bonney is the partner you need to make that happen.

We're constantly exploring the latest refrigeration systems to help you get ahead – with flexible installation and maintenance solutions to suit your business.

- Blast chillers and freezers
- Boning rooms
- Tunnel freezers
- Humidifying and dehumidifying systems
- Freezer rooms
- Plate freezing
- Brine and water chilling
- Spiral freezers
- Process rooms
- Tunnel cooling
- Cool rooms
- Cold storage
- Secondary cooling reticulation systems

## MEAT, SMALL GOODS AND SEAFOOD

Temperature control is vital in the processing and storage of meat, small goods and seafood products.

We have extensive experience in designing and installing superior refrigeration for your industry.

And with our service and maintenance solutions, our technicians will be onsite regularly – to keep a close eye on the performance of your system.

- Deli cases
- Multideck cases
- Cool rooms
- Ice machines
- CO2/NH3 systems
- Glass door freezer cases
- Display cabinets
- Freezer rooms
- CO2/HFC systems

## SUPERMARKET AND RETAIL

If you're looking for a refrigeration system for your supermarket or retail space, you deserve the utmost in performance, efficiency and reliability.

At Bonney, we're always ahead of the game when it comes to the latest in energy-efficiency and performance technology for your industry.

You will benefit from our expert retail knowledge – as well as our broad experience with specialised refrigeration systems.

# CLIENT STORIES

Big expansions, emergency parts and complex custom designs. We've been there for our clients as they've navigated a range of business changes and challenges. These projects showcase the versatility we offer as your refrigeration solutions partner.

## No 1 Foods achieves new heights in food production

We've had a long-term relationship with leading food provider, No 1 Foods.

So when business expansion was on the horizon, they turned to us for a refrigeration system to match their growing demands.

After working hard to understand their vision, we designed and installed a large state-of-the-art refrigeration plant – complete with a blast chiller, blast freezer and cold storage. We also provided mechanical ventilation in their processing area.

***Whatever growth plans you have in store, Bonney is ready for the challenge.***

## Business as usual for Infrabuild

Infrabuild, Australia's largest integrated manufacturer of steel products, needed its chiller replaced – urgently. And Bonney was onsite to replace that chiller in no time at all.

This meant that Infrabuild could continue business – without disruption.

***When business continuity is your priority, Bonney has your back.***

## A new, larger facility for Australian International Foods

Australian International Foods chose Bonney to design and install a refrigeration system for its new, larger state-of-the-art facility. And we delivered a complete custom solution that was perfectly up to the task.

It included a new ammonia system to serve the spiral freezers and cold storage and a high-tech positive pressured, HEPA filtered hicare production room. It also featured an ammonia glycol chiller and reticulation system to serve the blast chillers, production rooms and cold rooms.

***Does your system need an expert overhaul too? You'll be in good hands with Bonney.***

## Alba Cheese slashes its energy costs

Alba Cheese was after an energy efficient glycol chiller and reticulation system for its new production line. And they turned to Bonney.

After learning about Alba's precise requirements, we used the highest performance technology available to cut their energy use significantly. Our solution featured two independent chillers, a buffer storage tank – plus standby and duty glycol reticulation pumps.

***For energy-efficient solutions that improve your bottom line, Bonney has the expertise you need.***

### A speedy replacement part for Consolidated Freight

Consolidated Freight is a busy transport company that specialises in cold storage and vacuum cooling fresh produce. So, unsurprisingly, reliable refrigeration is critical to business continuity.

When it was time to replace an old evaporative condenser, Bonney was there.

Thanks to our broad supplier network, we were able to locate the right part for our client without fuss. This meant that we could fix their system quickly – with minimal disruption.

***Need replacement parts fast? Bonney has you covered.***

### A cold storage system for CWB Meats

CWB Meats, a red meat processing business, engaged us to design a new energy efficient, highly reliable cold storage system.

Our solution used high performance technology including PLC controlled variable speed drives, floating head pressure control and electronic expansion valves. We also used waste heat from the refrigeration system to defrost the evaporator and floor heating via a warm glycol reticulation system.

***If you're looking for a partner that takes efficiency and reliability seriously, look no further than Bonney.***

### Exceeding expectations for NTC Wismettac

Global food distributor NTC Wismettac needed a new plant for cold storage in its new distribution centre. And Bonney was pleased to exceed expectations in this project.

We met a challenging deadline through meticulous project management – and produced a system of the highest standard thanks to our superior skills in design and installation.

***With Bonney, you'll never have to sacrifice quality for speed or budget. Our track record says it all.***

### Allan Barnett Fishing's perfect temperature

Allan Barnett Fishing, a leading seafood processor, engaged Bonney to design and manufacture an IQF freezer to meet a growing market demand.

So we engineered and installed a highly bespoke system that featured a multi-belt tunnel freezer operating at precisely -34°C and a compressor package.

***When the market expects more from your business, you can expect more from Bonney.***
