

Your friendly local energy solutions provider

Hi, I'm Alison Charpentier – Founder & Managing Director of Elevate Solar and Energy Solutions. My vision? To position integrity and transparency at the centre of all we do.

That's why these are my promises to you:

Advice with a conscience

No sneaky sales tactics. No BS. Just expert advice from good human beings who genuinely care.

Absolute quality assurance

All our products are validated by the clean energy regulator – and we're a CEC approved solar retailer.

A true partnership

We're there for you at every stage of your journey with us – and provide after-sales support like no other.

How we can help you

When it comes to reducing your utility bills, there's rarely a silver bullet solution. That's why we take a two-pronged approach: energy efficiency and solar power.

Home efficiency audits

Solar system installations

It all starts with a *free* Elevate audit

With Elevate, reducing your energy usage doesn't mean living uncomfortably in the hot and cold months. It means making some *small, smart* adjustments in and around your home.

STEP ①

Taking stock of your utilities

When we audit your home, we look at everything in your house and backyard that can save you money on your gas, energy and water bills.

STEP ②

Making your home more efficient

We provide free tips and advice to help reduce your utility bills. We may also recommend new energy efficient appliances for long-term savings.

Powering your home with solar

Installing a solar system can reduce your electricity bills by up to 90% – and with government rebates and incentives, you'll see a quick return on your investment.

Panels

The foundation of your system, solar panels capture the sun's energy.

All our panels are high quality and trusted brands – and meet the Solar Panel Validation Initiative.

Inverters

Inverters convert the energy captured by your panels into a form of electricity that's usable to you.

And with Elevate, you'll receive a complimentary monitor to track your home's energy consumption.

Buy now, pay later – at a pace that's right for you

Are you itching to go solar but unable to afford a system outright? We partner with trusted lenders who allow you to pay your system off over time.

 @ElevateSolarQld

Elevate installed my system and provided outstanding care and after-sales service. I highly recommend Alison and her team to anyone thinking of going solar.

Michelle's story

After installing a solar system on her roof, Michelle has reduced her energy bills from \$185 a month – to a mere \$30 a month.

Residing in Hervey Bay, Michelle works from home alongside her husband.

With two people at home during the day in the Queensland heat, continuous air-conditioning was a necessity.

On top of this, Michelle was also faced with the usual high energy costs associated with running a home-office.

When Michelle approached us, we knew she would save substantially from installing a solar system.

After assessing her specific needs, we installed a 6.6kW system on her roof, with Suntech panels and a Fronius inverter.

Michelle hasn't had to change her living habits one little bit to see drastic savings – and she couldn't be happier.

Are your energy bills getting out of control?

Let Elevate give you clear, simple energy solutions to address your household's financial challenges.
