

INSPECTION & TESTING

Fire maintenance services – from a team who truly cares

Regular inspection and testing of the fire systems on your property isn't a maybe, it's a must. Thankfully, with Force Fire, you can be sure that your workplace is always compliant, your property is always protected – and your people are always safe.

Why Force Fire is a force in fire protection

15+

years

We've been a trusted name in fire inspection and testing since 2004

400+

sites

Our maintenance team visits countless sites across NSW every day

All

fire systems

We have extensive knowledge of all brands & types of fire systems

24/7

service

We offer 24/7 emergency fire system service & support

Accreditation and training that exceeds the industry norm

Members of the Force Fire team hold full accreditation under the FPAS scheme for:

- Fire Systems Design (FSD)
- Fire Safety Assessment (FSA)

This means we're able to sign off the essential safety measures listed in your Annual Fire Safety Statement (AFSS) – long before your AFSS due date.

But we don't stop there. We have an ongoing inhouse training plan for our staff to ensure they remain up-to-date with the latest developments in fire protection standards and technology.

Professional in every respect

Our job is to be a help, not a hindrance. Because after all, the people on your site are the ones representing you. So we know the little things that make a big difference when it comes to service.

Consistent staff

The same Force Fire staff member will service your fire system each time. That means true service and accountability when it matters most.

Punctual

We turn up when we say we will – and complete your inspection and testing on time, every time.

Respectful

Our maintenance team is well presented and always respectful to your staff and customers – while also ensuring minimal disruption on your site.

Transparent

We diligently record all our findings and present you with live data feeds and real-time reports. We also maintain accurate records at all times.

Compliance assured. Every standard met.

At Force Fire, we structure our schedule around your AFSS due date – to ensure you submit to council on time and within the prescribed tolerances of the standards.

We're proud to help you meet the following Australian standards:

Maintenance Standards:

- AS1851-2012 Routine service of fire protection systems and equipment, including:
 - Procedures, Records & System Interface Testing
 - Automatic Fire Sprinkler Systems
 - Fire Pumpsets
 - Fire Hydrant Systems
 - Fire Water Storage Tanks
 - Fire Detection & Alarms Systems
 - Special Hazard Systems
 - Delivery Lay Flat Fire Hose
 - Fire Hose Reels
 - Portable & Wheeled Fire Extinguishers
 - Fire Blankets
 - Passive Fire & Smoke Systems
- AS2293.2:2019 Emergency lighting and exit signs

Performance Standards (all versions):

- AS2118 Automatic fire sprinkler systems
- AS2419 Fire hydrant installations
- AS1670 Fire detection, warning, control and intercom systems
- AS2220.2 Emergency warning and intercommunication systems in buildings
- AS1668.1 Fire and smoke control in multi-compartment buildings
- AS4214 Gaseous fire extinguishing systems
- AS2441 Installation of fire hose reels
- AS2444 Portable fire extinguishers and fire blankets – Selection and location
- AS1905.1 Components for the protection of openings in fire-resistant walls
- AS2293.1 Emergency lighting and exit signs for buildings

We can also assess compliance to earlier performance standards and BCA requirements, including fire engineered solutions and Fire Engineering Reports.
