Kids need to begin flossing as soon as they have two teeth in contact with each other 🦷🦷

Starting to floss this early is important because decay is most common between teeth – where a toothbrush can't get to.

For the little ones, the GUM® flossers can be a great place to start. Kids can grip onto the handle and use it learn some flossing skills.

Our Oral Health Therapists teach all our patients how to floss. Pick up your own GUM® flosser at the clinic today!

Say hello to one of our newest dentist – Dr Deepa!

A natural with little ones, Dr Deepa always aims to bring a massive smile to their dial 😊

Outside of work, she enjoys spending time with her two young daughters – who keep her on her toes!

And if she ever gets a minute to spare, she enjoys experimenting in the kitchen with new recipes and baking👩🍳👩🍳

Do you think your little one might like to see Dr Deepa? Book now:

What do you think giving children sweet treats as a reward for good behaviour? 🤔💭

It's a common parenting practice (and we aren't hearing any complaints from the kids!)

BUT... research shows it, can teach children, to associate treats with happiness – leading to emotional eating later in life.

So, what are some alternatives?

How about making their reward a family outing instead? Or letting your child play a game on the iPad...

What does your family do for special rewards?

"Is fluoride harmful for children?" 🤔

Good question. And one we get asked a lot.

Fluoride is a naturally-occurring mineral – and an excellent protector against tooth decay👩🍳👩🍳

(Now you know why it's a common ingredient in toothpaste.)

To keep teeth strong and protected, it's important to make sure your child is using the right amount and strength of toothpaste for their age.

So, what's the magic amount? 🙌<https://buff.ly/2J9dM3r>

Did you know that teeth have something special in common with snowflakes and fingers?!

🦷❄️👉

Just like the patterns of a snowflake and fingerprint, every tooth is UNIQUE.

Each one has a different size, shape, pattern... and will be unique to you and you alone.

Bet you didn't know your teeth were so special, huh? ✨
