# THE INTUITIVE TORUS DASHBOARD

Rich, accurate data – in real time

COMPLETE CONTROL AT YOUR FINGERTIPS

Cloud-based, customisable and cutting-edge.

An integrated cabinet and software solution (hosted on Microsoft Azure), Torus is the 'key' to protecting your assets, people – and reputation.

QUICK AND SIMPLE TO SET UP

Your cabinet will automatically connect to our cloud software over the internet. No special ports or complex networking required.

SECURITY THAT'S SECOND TO NONE

With two-factor authentication, alarms and custom user settings, Torus offers a superior level of security that you won't find elsewhere.

CRITICAL INTEL AT YOUR FINGERTIPS

Access insightful reports and graphs containing live and historical data in an instant. That means faster, more informed decision making.

HIGHLY CUSTOMISABLE TO YOUR NEEDS

Torus can be configured extensively to your precise needs. This includes alarm settings, user permissions, group handling rules and more.

SMS AND EMAIL ALERTS IN REAL TIME

Torus delivers activity updates to administrators – via SMS and email alerts. You will always know when a key is not returned or if unauthorised access occurs.

INTEGRATES WITH THIRD-PARTY SOFTWARE

Torus software integrates effortlessly with a wide range of access control systems using our REST API.
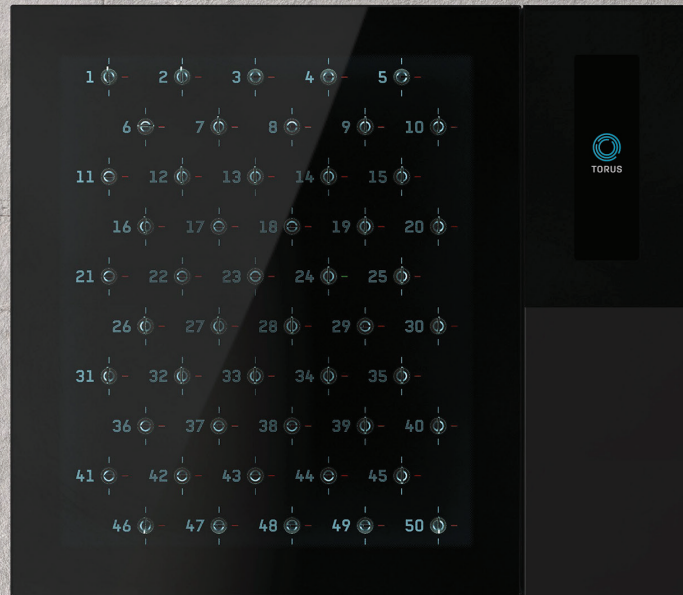

THE TORUS STORY

Founded in Australia as CIC Technology in 2001, our business has always been guided by a single philosophy – that the value of technology is to improve people's lives.

That's why we developed a solution to automate repetitive activities and provide greater control and security over your assets.

With a strong foothold in the Australian government sector since day one, our key management solution is now widely trusted by diverse industries across Australia, Asia, Europe and North America.

Known for exceptional customer service and a strong partnership network, Torus is a proud global leader in its field.

The sleek and modern Torus cabinet
