

When performance is a *must*

FOCUSED ON YOU AND YOUR CUSTOMERS

We recognise the quality you need – and the reliability your customers expect. That's why we deliver durability without compromise.

Our goal is to meet and exceed your expectations with every order.

A 20-YEAR TRACK RECORD

Sailmakers around the world have been trusting Endeavour Rings for more than 20 years.

So you can rest assured that we understand your industry – and the definition of true performance.

BUILT TO LAST

Made with 316L stainless steel, Endeavour Rings aren't built to simply match your sails. They're built to outlast them.

It's the component that you and your customers can always count on.

QUALITY WITHOUT COMPROMISE

ISO9001 certified, we're stringent at every stage of the manufacturing process.

From testing raw materials to assessing the final product, our quality control systems are rigorous and robust.

MORE SIZES. MORE FREEDOM.

Including 17mm and 30mm, our wide range of sizes means greater freedom in your sailmaking.

Better yet, we also offer dedicated tools to suit.

CONTINUAL INNOVATION

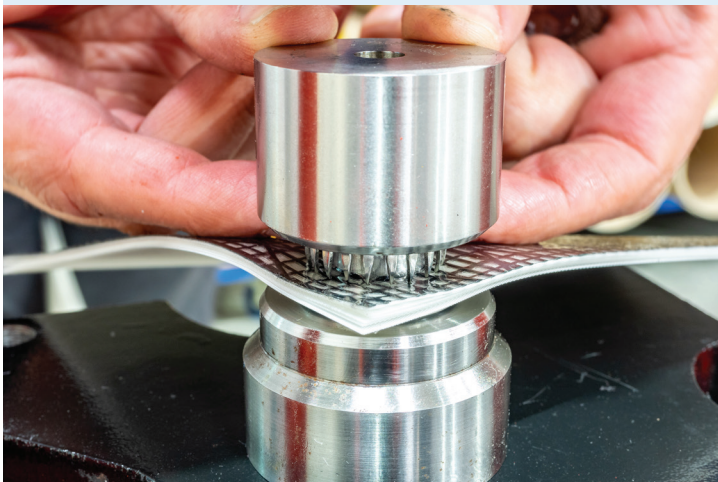

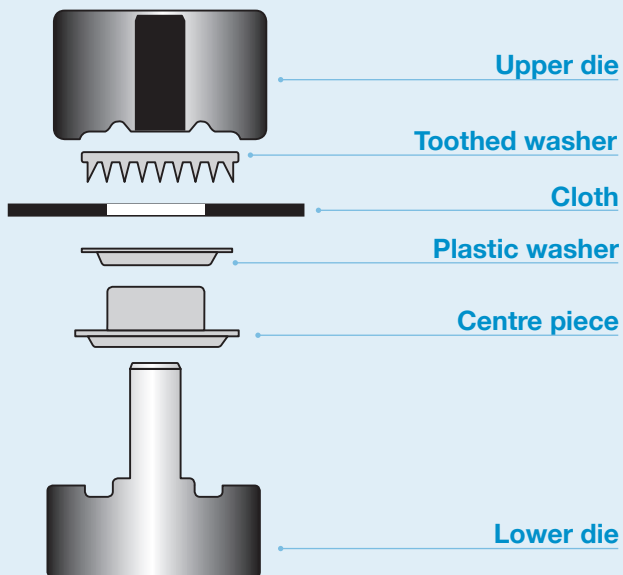

At Paskal, we strive for continual innovation in all we do. And our Endeavour Rings are no exception.

Whether it's our choice of partners, materials or tools, we're always raising the bar – to achieve even higher standards than before.

ENDEAVOUR RING SPECIFICATIONS
